KOSMIC RACING DEPARTMENT'S 2018 DRIVERS

The Kosmic Kart Racing Department completes its official drivers' lineup with confirmed drivers and new entries

The Kosmic Racing Department unveils its cards for 2018.

No surprise regarding the scheduled sports commitments. In the official Kosmic team's calendar, under **Olivier Marechal's** direction, there are, as usual, the most important world karting appointments: the **WSK Series**, the "classic" **Winter Cup** in Lonato as well as the **European and World CIK-FIA championships**.

On the drivers' side, the expert **Patrik Hajek** is preparing to start his third season with the team colors, in **KZ of the CIK FIA races**.

No news in **KZ2** too, a category in which we find the same 2017 couple of drivers, the Swedish **Axel Bengtsson** and the Danish **Oliver Rasmussen**.

Roman Stanek, after the year 2017 in OKJ, shifts to **OK** class, with the new Swedish teammate **Viktor Gustafsson**.

Also unpublished is the couple of drivers defending the Kosmic colors in the **OKJ** class. The Brazilian **Rafael Camara**, already under the Racing Department's tent during the Final Cup 2017, will be joined by a new entry, the French driver **Hadrien David**.
