Evento: 3° rd Europeo OK e OKJ – Ampfing (Germania)

EXCELLENT PERFORMANCE ON THE OCCASION OF THE OK-OKJ EUROPEAN CHAMPIONSHIP IN GERMANY

On the Ampfing circuit excellent performance of the Kosmic Racing Department.

The spotlight on the **Kart Grand Prix - Germany** goes out, the third round (of four) of the **FIA Karting European Championship** reserved for the **OK and OKJ single-speed** categories that have given a show on the **German Ampfing circuit**. A track that saw the **Kosmic Racing Department** as protagonist and, in particular, **David Hadrien**, author of **three victories in the Saturday heats** and an excellent **fifth place in the final of Sunday**.

David starts the German weekend very well, winning the **eighth time in the Junior category ranking**, followed by **three wins during the qualifying heats** and a second place. With these results the French driver conquers the **second position on the starting grid of the final**, where at the start he is immediately protagonist in the battle for the lead of the race. Hadrien, author of an excellent performance, ends **fifth under the checkered flag**.

This result, in any case, proves to be important for the French driver, who can now be more confident for the upcoming events of the 2018 season. On the German circuit of **Ampfing**, also his teammate **Rafael Camara** behaved well, confirming his great growth and able to constantly center the **Top 10 list in the eliminatory heats** without, however, succeeding as he wanted to in the final category. The work done by the American **Jak Crawford**, however, was lost by a **penalty of ten seconds in the decisive race** for the detachment of the front fairing of his Kosmic chassis, an inconvenience that made his weekend end in the back positions.

Little luck also for our drivers of the **Senior category**, especially for **Roman Stanek** who could not impose himself in the final in order to recover his disadvantage in the Championship standings. The Czech rider has **advanced in the eliminatory heats**, centering, among other results, **two third places** that allowed him to start from the **seventh position in the decisive race**.

At the wheel of our **Kosmic Mercury S chassis powered by Vortex** also ran the newcomer **David Rozenfeld**, who as his best result got a **fourth place in the qualifying heats**. **Viktor Gustafsson**, finally, could not compete for a **rib injury**, which kept him away from the German track for the entire race weekend.

Now the next competitive engagement of the **Kosmic Racing Department** is that of the weekend of **June 21st-24th**, when our drivers will race on the **South Garda Karting of Lonato** for the **WSK Open Cup** organized by WSK Promotion.
