BRP-Rotax is at the forefront of shaping the future of electric kart racing with the E20 E-Kart, a remarkable fusion of speed and sustainability. If you've ever imagined the exhilaration of electric racing, seize the opportunity now

from May 24-26, 2024 in
Wackersdorf (Germany).

Rotax invites enthusiasts to participate in dedicated test days, providing a firsthand experience of the E20's power and performance.

What makes these test days stand out?
Here's a glimpse:

Date and Location: Prokart Raceland
Wackersdorf (Germany) from May 24-26,
2024

Arrive & Drive: Just pick-up your racing gear and come to Prokart Raceland in Wackersdorf (Germany). Simply arrive at the track, and everything you need - from the E20 E-Kart to expert support - is ready and waiting.

Expert Guidance: The well trained and dedicated Rotax E-Kart Team is there to offer support and guidance and is taking the time for the data analysis to improve your time on the track.

Feel the speed: The Rotax E20 will swap your racing experience with unbeatable acceleration speeding you up from 0 to 100 km/h in 3,5 seconds, a constant power during the complete race distance and a parity that is unparalleled.

Fun Fact: The Boost button on the steering wheel will makes the race more interesting

for you. It gives you an extra power and it's up to you to find the best strategy when using the Boost. It's an experience that must be felt to be believed.

Sustainability: Experience the eco-conscious approach of electric racing. The Rotax E20 significantly reduces emissions and noise pollution, paving the way for a greener future.

But here's the kicker: Rotax racers who are registered for the RMC Euro Trophy E20 categories can test the E20 free of charge. It's a golden opportunity to use the test days as a practice, to hone your skills and prepare for the challenges ahead.
